There are many mobile browsers that are much better than Chrome, especially in terms of privacy, security, and personalization. To make your online activity even more private and secure, the Tor Browser uses a network of servers to send requests through Multiple Connections to hide your online identity when you visit a website. And if the standard theme do not suit your style, you can easily change the theme for ultraviolet, purple haze, hacker, white wolf, and more to to date on the latest gaming news, deals, and release date. Most Android phone comes pre-installed with Chrome browser and many users also prefer Chrome over any other browser. The browser is based on Chromium and comes with lots of features like ad-blocker, dark mode, news feeds, pop-ups blocker, and so on.You can also enable an anti-tracking feature that will prevent online trackers from spying on your web activities. For instance, it has support for extensions, homepage customization, a light & dark theme, and the option to set address bar/toolbar at the top or bottom.In this browser, you will also get an enhanced tracking protection feature that you can use to block online trackers that follow you around while surfing the web. As a result, the website loads faster and you can save up to 90% of the data.Even though it is a lite version of the Opera Browser, it still manages to pack many useful features, such as a built-in ad blocker, night mode, sync, dark mode, themes, news feeds, and more.ConclusionWell, these were my list of the top 10 best web browsers for Android in 2022. And by clicking on the Brave icon (placed at the top right corner of the address bar) you will see how many ads and trackers Brave Shield has blocked on the currently opened website.To further increase your security, it also forces some sites to open in HTTPS. I have tried to cover all the aspects of the browsers. So it has become very hard for me to ditch Chrome. You can change the home page layout to focused, inspirational, informational, or create your own custom layout. So does that mean other android browsers areneAAat worth trying?
